KOHIMA-MARIANI TRANSMISSION LIMITED

BOARD'S REPORT

To the Members

The Board of Directors of Kohima-Mariani Transmission Limited (the "Board") has pleasure in presenting the Ninth Annual Report and the Audited Standalone Financial Statements of the Company for the Financial Year ended 31 March 2024 ("FY").

1. BACKGROUND

Kohima-Mariani Transmission Limited ("KMTL" / the "Company") is a Special Purpose Vehicle incorporated to establish a transmission system for "North Eastern Region Strengthening Scheme (NERSS-VI)". The Project comprises two 400 Kilo-volt ("Kv") D/c lines viz., Imphal to Kohima and New Kohima to New Mariani and a 400/220 Kv, 7 x 167 Mega Volt Amp ("MVA"), 400/220 Kv Gas Insulated Switchgear Substation ("GIS") at New Kohima. The Project was commissioned in FY 2020-21.

In FY 2021-22, Apraava Energy Private Limited ("Apraava Energy") acquired 49% equity shares of the Company from Kalpataru Power Transmission Limited (23%) ("KPTL") and Techno Electric & Engineering Company (26%) ("Techno"). The Company is a subsidiary of Apraava Energy since 20 December 2021. Further, during FY 2022-23, Apraava Energy acquired another 25% as the Second Tranche Sale Shares on 24 February 2023. Accordingly, Apraava Energy now holds 74% of the Company's equity share capital. As per the Share Purchase and Shareholders Agreement, Apraava Energy will acquire the third and last tranche of the remaining 24% equity share capital by December 2025.

Apraava Energy is jointly owned by CLP Group, one of the largest investor-owned power businesses in Asia and Caisse de dépôt et placement du Québec (CDPQ), one of Canada's leading institutional fund managers.

There is no change in the nature of business of the Company during the year under review.

2. INDUSTRY AND ECONOMIC SCENARIO

In the past fiscal year, the demand for electricity surged by a substantial 9%, reaching an unprecedented peak demand of 243 GW, reflecting the nation's growing energy needs. Balancing the growing demand with the imperative of transitioning towards sustainable energy goals emerged as a critical challenge. Nevertheless, there remained a steadfast focus on expanding renewable energy (RE) while ensuring optimal utilization of existing thermal generation capacity. Notably, approximately 14 GW of RE capacity was added during the year, supported by the development of over 10,691 ckm of transmission lines to efficiently evacuate renewable power. Looking ahead, the government has unveiled ambitious plans to undertake bidding for 50 GW of RE annually over the next five years, alongside substantial

KOHIMA-MARIANI TRANSMISSION LIMITED

additions in the transmission infrastructure. To manage this growing emphasis on RE, there is a renewed focus on achieving firm and dispatchable RE sources, further facilitated by the anticipated reduction in battery storage costs. Concurrently, efforts to modernize the grid are underway, with the accelerated rollout of smart meter installations under the Revamped Distribution Sector Scheme (RDSS). Besides the above, various initiatives have been undertaken to promote efficiency through market mechanism, including the introduction of carbon trading in the country. The government has also taken various initiatives for promoting domestic manufacturing of critical components like solar modules, battery, electrolyzers etc. and technologies viz. green hydrogen, electric vehicles etc. Despite these strides, challenges such as land acquisition and supply chain issues persist, underscoring the need for continued efforts to overcome obstacles and drive the transition towards a sustainable energy future.

Key Trends: 2023-2024

During the fiscal year 2023-24 the transmission system in India witnessed significant growth and expansion driven by several factors including increasing power demand, renewable energy integration, and govt. initiatives to strengthen the power infrastructure. Key among these initiatives was the implementation of the Green Energy Corridors, which played a pivotal role in facilitating the growth of transmission system during this period. The involvement of the private sector in transmission projects continued to grow, with public-private partnerships (PPPs) and competitive bidding processes being adopted for the development of transmission infrastructure. Around 10,691 ckm of Transmission Lines and 59,493 MVA transformation capacities were added during the period, bringing the total transmission line length to 4,82,032 ck and 12,39,845 MVA of transformation capacity respectively. Moreover, the inter-regional transmission capacity has also got enhanced and reached 116 GW enabling seamless transactions across the country with hardly any transmission congestion observed during the year. To further promote efficiency and reliability in the grid, the Central Electricity Regulatory Commission (CERC) introduced various regulations, including the Indian Electricity Grid Code Regulations, Connectivity and General Network Access Regulations (First Amendment), and Sharing of Inter-State Transmission Charges and Losses Regulations (First Amendment), effective from October 1, 2023. Despite challenges such as land acquisition hurdles, supply chain constraints and cybersecurity risks etc., ongoing investments in grid modernization and capacity expansion are driving India's transition to cleaner energy sources.

Outlook for FY 2024-25

Looking ahead to the transmission sector in India for 2024-2025, significant expansion is anticipated, propelled by the nation's unwavering commitment to integrating renewable energy sources. Central Electricity Authority (CEA) has released the draft National Electricity Policy Vol II – Transmission outlining the detailed planning of Transmission System till FY 2026-27. It is anticipated that approximately INR 1 trillion worth of Transmission Projects will be put up for bidding during the upcoming year presenting immense opportunities for the players in the Transmission sector. The government initiatives such as Green Energy Corridor

KOHIMA-MARIANI TRANSMISSION LIMITED

and PM Gati Shakti National Master Plan etc., focusing on grid modernization and capacity expansion, are expected to drive the investments in transmission sector and support India's ambitious renewable energy targets.

4. OPERATIONAL PERFORMANCE

The cumulative transmission system availability of the 400 kV D/C Kohima - Mariani transmission line for FY 2023-24 has been 99.86% (99.98% in FY 2022-23).

The Company has filed a petition with the Central Electricity Regulatory Commission (CERC), seeking relief regarding the increase in project costs, primarily due to events such as the implementation of GST and land compensation regulations. During the year ending on 31 March 2024, the Company received a favorable order from CERC, granting relief in the form of an extension of the Transmission Service Agreement (TSA) until 2055 and an increase in the yearly tariff.

KOHIMA-MARIANI TRANSMISSION LIMITED

As a result of this order, the approved cumulative increase in the project cost is Rs 1,373.64 Mn. According to the CERC order dated February 25, 2023, for every increase of Rs. 20.90 Mn in project cost, an increase of 0.32% of the scheduled tariff will be awarded, resulting in an annual tariff increase of 20.80%.

During the FY, following key activities were undertaken for system enhancement and business sustainability :

- **System Enhancement**
 - Liquid Rubber painting carried out on exposed portion of concrete columns of towers (in seasonal waterlogged areas)
 - Limewash painting carried out to eliminate black algae formation on chimney of Transmission Tower
 - Implemented algae cleaning solution for towers to prevent algae formation
 - Implemented Polymer insulator cleaning solution to prevent the dust deposit on Polymer insulator and increased the life span
- **Business sustainability**
 - Complete Prohibition on single usage of Polythene bags
 - Engaged a waste management vendor at 400/220 KV GIS Substation, New Kohima, Nagaland for waste disposal
 - Tree Plantations done in 400/220 KV GIS Substation, New Kohima, Nagaland

5. TRANSFER TO RESERVES

During the FY, INR 298.20 Mn. has been transferred from the Debenture Redemption Reserve ("DRR") (No amount was transferred from the DRR in FY 2021-22). During the FY, the Board has decided not to transfer any amounts to the Free Reserves.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance, total comprehensive income, changes in equity and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) specified under section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors is also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls with reference to financial statements in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2020 ("the Order") issued by the Central Government of India in terms of sub-section (11) of section 143 of the Act, we give in Annexure "A", a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.
2. As required by Section 143(3) of the Act, we report that:
 - a. We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.

ANNEXURE "A" TO THE INDEPENDENT AUDITOR'S REPORT

(Referred to in paragraph 1 under 'Report on Other Legal and Regulatory Requirements' section of our report of even date to the members of **Kohima-Mariani Transmission Limited** on the financial statements of the Company for the year ended March 31, 2024)

- i. (a) (A) The Company has maintained proper records showing full particulars, including quantitative details and situation of Property, Plant and Equipment and relevant details of right-of-use assets.
- (B) The Company does not have any intangible assets and therefore, reporting under clause (i)(a)(B) of the Order is not applicable to the Company.
- (b) The Company has a program of physical verification of Property, Plant and Equipment and right-of-use assets to cover all assets within a period of three years, to be carried out at one time or split over a number of times, which in our opinion, is reasonable having regard to the size of the Company and the nature of its assets. Pursuant to the program, Property, Plant and Equipment and right-of-use assets were physically verified by the Management during the year. According to information and explanations given to us, no material discrepancies were noticed on such verification.
- (c) According to the information and explanations given to us and on the basis of our examination of the records of the Company, the title deeds of immovable properties (other than properties where the Company is the lessee and the lease agreements are duly executed in favour of the lessee) are held in the name of the Company.
- (d) The Company has not revalued any Property, Plant and Equipment including Right of use Assets during the year.
- (e) According to information and explanations given to us, no proceedings have been initiated during the year or are pending against the Company as at March 31, 2024 for holding any benami property under the Benami Transactions (Prohibition) Act, 1988 (as amended in 2016) and rules made thereunder.
- ii. (a) The company does not have any inventory and therefore, reporting under clause (ii)(a) of the order is not applicable to the company.
- (b) The Company has not availed any working capital limits at any points of time during the year, from banks or financial institutions and therefore, reporting under clause (ii)(b) of the Order is not applicable to the Company.
- iii. (a) The Company has provided loan during the year and details of which are given below:

Particulars	Rs. millions
Aggregate amount granted/ provided during the year:	
- Holding Company	1,270
Balance outstanding as at balance sheet date in respect of above:	
- Holding Company	1,270

- (b) The terms and conditions of the grant of the above-mentioned loan, during the year are, in our opinion, prima facie, not prejudicial to the Company's interest.
- (c) The Company has granted Interest free loans which are repayable on demand. During the year the Company has not demanded such loans. Having regard to the fact that the repayment of principal has not been demanded by the Company, in our opinion the repayments of principal amounts are regular. (Refer reporting under clause (iii)(f) below).
- (d) In respect of loans granted by the Company, there is no overdue amount remaining outstanding as at the balance sheet date.
- (e) No loan granted by the Company which has fallen due during the year, has been renewed or extended or fresh loans granted to settle the overdue of existing loans given to the same parties.
- (f) The Company has granted loan repayable on demand during the year, the details are given below:

Particulars	(Rs. millions)		
	All Parties	Promoters	Related Parties
Aggregate amount of loans repayable on demand	1,270	1,270	Nil
Percentage of loans/ advances in nature of loans to the total loans	100%	100%	Nil

- iv. The Company is engaged in providing infrastructure facilities as specified in Schedule VI to the Act and accordingly, the provisions of Section 186, except sub-section (1), of the Act are not applicable to the Company (Refer Note 10 to the financial statements). In our opinion and according to the information and explanations given to us, the Company has complied with the provisions of Section 185 and 186(1) of the Act, in respect of loans given by it.
- v. According to the information and explanations given to us, the Company has not accepted any deposits during the year from the public within the meaning of provisions of section 73 to 76 of the Act, and the rules framed thereunder or under the directives issued by the Reserve Bank of India and therefore, reporting under clause (v) of the Order is not applicable to the Company.
- vi. We have broadly reviewed the books of account maintained by the Company pursuant to the Companies (Cost Records and Audit) Rules, 2014, as amended, prescribed by the Central Government for maintenance of cost records under Section 148(1) of the Companies Act, 2013, and are of the opinion that, prima facie, the prescribed cost records have been made and maintained by the Company. We have, however, not made a detailed examination of the cost records with a view to determine whether they are accurate or complete.
- vii. (a) According to the information and explanations given to us and on the basis of our examination of the records, the Company has been regular in depositing with appropriate authorities undisputed statutory dues, including provident fund, income-tax, goods and services tax, cess, and any other statutory dues applicable to it. Further, no undisputed amounts payable in respect of income tax, goods and services tax, cess and other statutory dues were in arrears, as at March 31, 2024 for a period of more than six months from the date they become payable.

- (b) According to the information and explanations given to us and on the basis of our examination of the records of the Company, there are no dues of provident fund, Income tax, goods and services tax and any other statutory dues which have not been deposited on account of any dispute.
- viii. According to the information and explanations given to us, no unrecorded transactions in the books of account have been surrendered or disclosed as income during the year in the tax assessments under the Income Tax Act, 1961 (43 of 1961).
- ix. (a) In our opinion and according to the information and explanations given to us, the Company has not defaulted in repayment of any loan or other borrowings or in the payment of interest thereon to any lender.
- (b) The Company has not been declared a willful defaulter by any bank or financial institution or other lenders.
- (c) The Company has not taken any term loan during the year and there are no unutilised term loans at the beginning of the year and hence, reporting under clause (ix)(c) of the Order is not applicable.
- (d) According to the information and explanations given to us, and the procedures performed by us, and on an overall examination of the financial statements of the Company, we report that no funds raised on short-term basis have been used for long-term purposes by the Company.
- (e) The Company does not have any subsidiaries, associates or joint ventures and hence, reporting under this clause of the Order is not applicable.
- (f) The Company does not have any subsidiaries, associates or joint ventures and hence, reporting under this clause of the order is not applicable.
- x. (a) The Company has not raised moneys by way of initial public offer or further public offer (including debt instrument) during the year and therefore, reporting under this clause of the order is not applicable to the Company.
- (b) The company has not made any preferential allotment or private placement of shares or convertible debentures (fully or partly or optionally) and therefore, reporting under clause (x)(b) of the Order is not applicable to the Company.
- xi. (a) To the best of our knowledge and according to information and explanations given to us, no fraud by the company or on the company has been noticed or reported during the year;
- (b) No report under sub-section (12) of section 143 of the Companies Act has been filed in Form ADT- 4 as prescribed under rule 13 of Companies (Audit and Auditors) Rules, 2014 with the Central Government, during the year and upto the date of this report;
- (c) According to the information and explanations given to us, the Company has not received any whistle-blower complaints during the year.

- xii. The Company is not a Nidhi Company and hence reporting under clause (xii) of the Order is not applicable.
- xiii. In our opinion and according to the information and explanations given to us and based on our examination of the records of the Company, all transactions with the related parties are in compliance with Section 177 and 188 of the Act where applicable and the details have been disclosed in the financial statements as required by the applicable Indian Accounting Standards.
- xiv. (a) In our opinion and based on our examination, the Company has an internal audit system commensurate with the size and nature of its business.
- (b) We have considered the internal audit reports of the Company issued till date, for the period under audit.
- xv. In our opinion and according to the information and explanations given to us, the Company has not entered into any non-cash transactions with directors or persons connected with directors and therefore, reporting under clause (xv) of the Order is not applicable to the Company.
- xvi. (a) In our opinion, the Company is not required to be registered under section 45-IA of the Reserve Bank of India Act, 1934. Hence, reporting under clause 3(xvi)(a), (b) and (c) of the order is not applicable.
- (b) In our opinion and according to the information and explanations given to us the Company has not conducted any non-banking financial or housing finance activities, therefore, reporting under clause (xvi) (b) of the order is not applicable.
- (b) The Company is not a Core Investment Company as defined in the regulations made by Reserve Bank of India.
- (c) The Company does not have any Core investment Company which are part of the group.
- xvii. The Company has not incurred cash losses during the financial year covered by our audit and the immediately preceding financial year.
- xviii. There has been no resignation of the statutory auditors of the Company during the year.
- xix. According to the information and explanations given to us and on the basis of the financial ratios, ageing and expected dates of realization of financial assets and payment of financial liabilities, other information accompanying the financial statements, our knowledge of the Board of Directors and management plans and based on our examination of the evidence supporting the assumptions, nothing has come to our attention, which causes us to believe that any material uncertainty exists as on the date of the audit report that Company is not capable of meeting its liabilities existing at the date of balance sheet as and when they fall due within a period of one year from the balance sheet date. We, however, state that this is not an assurance as to the future viability of the Company. We further state that our reporting is based on the facts up to the date of the audit report and we neither give any guarantee nor any assurance that all liabilities falling due within a period of one year from the balance sheet date, will get discharged by the Company as and when they fall due.

- xx. (a) There are no unspent amounts towards Corporate Social Responsibility (CSR) on other than ongoing projects requiring a transfer to a Fund specified in Schedule VII to the Companies Act, 2013 in compliance with second proviso to sub-section (5) of Section 135 of the said Act. Accordingly, reporting under clause 3(xx)(a) of the Order is not applicable for the year.
- (b) In respect of ongoing projects, the Company has transferred unspent Corporate Social Responsibility (CSR) amount as at the end of the previous financial year, to a Special account within a period of 30 days from the end of the said financial year in compliance with the provision of section 135(6) of the Act.
- xxi. The Company is not required to prepare consolidated Financial Statements and therefore, reporting under this clause of the Order is not applicable to the Company.

ANNEXURE "B" TO THE INDEPENDENT AUDITORS' REPORT

(Referred to in paragraph 2(g) under 'Report on Other Legal and Regulatory Requirements' section of our report to the Members of **Kohima-Mariani Transmission Limited** on the financial statements of even date)

Report on the Internal Financial Controls with reference to financial statements under Clause (i) of Sub-section 3 of Section 143 of the Act.

We have audited the internal financial controls with reference to financial statements of **Kohima-Mariani Transmission Limited** ("the Company") as of March 31, 2024 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls with reference to financial statements based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ("ICAI"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls with reference to financial statements based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the, "Guidance note") issued by the ICAI and the Standards on Auditing prescribed under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls with reference to the financial statements. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to financial statements was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to financial statements and their operating effectiveness. Our audit of internal financial controls with reference to financial statements included obtaining an understanding of internal financial controls with reference to financial statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls with reference to financial statements.

Meaning of Internal Financial Controls with reference to financial statements

A company's internal financial controls with reference to financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial controls with reference to financial statements includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls with reference to financial statements

Because of the inherent limitations of internal financial controls with reference to financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to financial statements to future periods are subject to the risk that the internal financial control with reference to financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, adequate internal financial controls with reference to financial statements and such internal financial controls with reference to financial statements were operating effectively as at March 31, 2024 based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

During the FY 22-23, Pursuant to terms of Share Purchase Agreement, KPTL has transferred its 1,83,29,849 Shares (Rs. 10 each) of KMTL to AEPL that resulted into 74 % stake by AEPL and 26% stake by KPTL.

2 Statement of Compliance

These Financial Statements have been prepared in accordance with the applicable Indian Accounting Standards ("Ind AS") prescribed under Section 133 of the Companies Act, 2013 ("Act") read with the Companies (Indian Accounting Standards) Rules 2015 and other relevant provisions of the Act and Rules thereunder, as amended from time to time.

3 Basis of preparation

These financial statements have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under Section 133 of the Companies Act, 2013. The financial statements have also been prepared in accordance with the relevant presentation requirements of the Companies Act, 2013 and presentation requirements of Schedule III to the Companies Act, 2013, (Ind AS compliant Schedule III), as applicable.

Recent Pronouncements for Indian Accounting Standards (Ind AS)

Ministry of Corporate Affairs ("MCA") notifies new standards or amendments to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time. During the year ended 31st March, 2024, MCA has not notified any new standard or amendments to the existing standards applicable to the Company.

The Financial Statements have been prepared on the historical cost convention on accrual basis except for certain financial assets and liabilities that are measured at fair value, amortised cost or present value, as disclosed in accounting policies.

Historical cost is generally based on the fair value of the consideration given in exchange for goods or services.

As the operating cycle cannot be identified in normal course due to the special nature of the industry, the same has been assumed to have duration of 12 months. Accordingly, all assets and liabilities have been classified as current or non-current as per the Company's operating cycle and other criteria set out in Ind AS-1 'Presentation of Financial Statements' and Schedule III to the Companies Act, 2013.

The Financial Statements have been presented in Indian Rupees (INR), which is also the Company's functional currency. All values are rounded off to the nearest two decimal Million, unless otherwise indicated.

Current / Non-Current Classification

Any asset or liability is classified as current if it satisfies any of the following conditions:

- i. the asset/liability is expected to be realized / settled in the company's normal operating cycle;
- ii. the asset is intended for sale or consumption;
- iii. the asset/liability is held primarily for the purpose of trading;
- iv. the asset/liability is expected to be realized/ settled within twelve months after the reporting period;
- v. the asset is cash or cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting date;
- vi. in the case of a liability, the Group does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting date.

All other assets and liabilities are classified as non-current.

For the purpose of current/non-current classification of assets and liabilities, the company has ascertained its normal operating cycle as twelve months. This is based on the nature of services and the time between the acquisition of assets or inventories for processing and their realization in cash and cash equivalents.

4 Material Accounting Policy Information

4.1 Revenue Recognition and other income

Revenues are recognised when the Company satisfies the performance obligation by transferring a promised product or service to a customer in an amount that reflects the consideration which the company expects to receive in exchange for those goods or services and its collectability is probable. Revenue from services is recognised at a point in time as per the terms of the contract as and when performance obligations are fulfilled. When there is uncertainty as to measurement or ultimate collectability, revenue recognition is postponed until such uncertainty is resolved.

Revenue is measured at the transaction price of the consideration received or receivable duly adjusted for variable consideration and the same represents amounts receivable for goods and services provided in the normal course of business.

When rebate, incentive and penalties arrangements result in variable consideration, appropriate estimates are made and estimated variable consideration is recognised as a deduction from revenue at the point of sale (to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue will not be required). The Company typically uses the expected value method for estimating variable consideration, reflecting that such contracts have similar characteristics and a range of possible outcomes.

The contract asset or a contract liability is recognised when either party to a contract has performed, depending on the relationship between the company's performance and the customer's payment.

Interest Income

Interest income is recognized on time proportion basis.

Other Income

Other income is recognized on accrual basis except when realization of such income is uncertain.

4.2 Property, Plant and equipment (PPE)

The expenses incurred during construction period including directly attributable administrative expenses and Interest have been treated as Capital Work in Progress. The company has capitalised the work in progress when the asset is ready to put to use.

Property, Plant and Equipment (PPE) are stated at cost of acquisition/construction net of recoverable taxes, less accumulated depreciation / amortization and impairment loss, if any. All costs, including finance costs and adjustment arising from exchange rate variations attributable to acquisition of PPE till assets are put to use, are capitalized.

An item of PPE is de-recognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of PPE is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognized in the Statement of Profit and Loss.

4.3 Depreciation and Amortization

Depreciation is provided on all depreciable Property, Plant and equipment over useful life of the assets estimated by the management which coincide the life specified in Part C of Schedule II to the Companies Act, 2013. Depreciation is provided on Straight Line Method (SLM) basis.

4.4 Borrowing Costs

Borrowing costs that are directly attributable to the acquisition, construction or production of qualifying assets are capitalized as part of the cost of such assets. All other borrowing costs are recognized as expense in the period in which they are incurred.

Interest income earned on the temporary investment of specific borrowing pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalization.

4.5 Provisions, Contingent Liabilities and Assets

Provisions are recognised when there is present obligation (legal or constructive) as a result of a past event and it is probable that company will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material).

A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no disclosure is made.

Contingent Assets are not recognised but disclosed in the Financial Statements when economic inflow is probable.

4.6 Statement of Cash Flows

Cash flows are reported using the indirect method, whereby profit/loss is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from regular operating, financial and investing activities of the Company are segregated.

4.7 Income Taxes

Income tax expense comprises current tax expense and net change in the deferred tax asset or liability during the year. Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.

Current income taxes

Tax on income for the current period is determined on the basis of estimated taxable income and tax credit computed in accordance with the provisions of the Income Tax Act, 1961.

4.8 Deferred income taxes

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be

4.9 Earning Per Share

Basic earnings per share is calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period is adjusted for the effects of all dilutive potential equity shares.

4.10 Cash and Cash Equivalents

For the purpose of presentation in the Statement of Cash flow, cash and cash equivalents included cash on hand, deposit held at call with financial institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to insignificant risk of changes in value.

4.11 Financial instruments

A financial instrument is a contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

(i) Initial recognition and measurement:

Financial assets and financial liabilities are initially measured at fair value except trade receivable which are recorded at transaction price. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial asset and liabilities at fair value through profit & loss) are added to or deducted from the fair value measured on initial recognition of the financial assets or financial liabilities.

(ii) Classification:

The Company classifies financial assets as subsequently measured at amortised cost, fair value through other comprehensive income or fair value through profit or loss on the basis of its business model for managing the financial assets and the contractual cash flows characteristics of the financial asset.

All financial liabilities are classified as subsequently measured at amortised cost except for financial liabilities at fair value through profit or loss. Such liabilities, including derivatives, are subsequently measured at fair value, with any gains or losses arising on re-measurement recognised in profit or loss.

Financial instruments are classified as a liability or equity according to the substance of the contractual arrangement and not its legal form.

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by a company are recognised at the proceeds received, net of issue costs.

(iii) Financial assets at amortised cost

Financial assets are subsequently measured at amortised cost, using the effective interest rate method, if:

- the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

This category generally applies to trade and other receivables.

(iv) Financial asset at fair value through other comprehensive income (FVTOCI)

Financial assets are measured at fair value through other comprehensive income if these financial assets are held within business whose objective is achieved by both collecting contractual cash flow and selling financial asset and the contractual terms of financial asset give rise on specific dates to cash flows that are solely payment of principal and interest on principal amount outstanding.

(v) Financial asset at fair value through profit or loss (FVTPL)

Financial assets are measured at fair value through profit or loss unless it is measured at amortized cost or fair value through other comprehensive income. Financial assets under this category are measured initially as well as at each reporting date at fair value with all changes recognized in profit or loss.

(vi) Financial Liabilities

All financial liabilities are subsequently measured at amortised cost except for financial liabilities measured at fair value through P&L. Financial liabilities at FVTPL are stated at fair value, with any gains or losses arising on re-measurement recognized in the statement of profit or loss.

(vii) Derecognition

A financial asset is derecognised when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party. If the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognises its retained interest in the asset.

On derecognition of a financial asset, the difference between the asset's carrying amount and the sum of the consideration received and/or receivable and the cumulative gain or loss that had been recognised in other comprehensive income and accumulated in equity is recognised in the statement of profit or loss.

A financial liability is derecognised when the obligation under the liability is discharged, cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing financial liability are substantially modified, such exchange or modification is accounted as derecognition of the original financial liability and the recognition of a new financial liability. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in the statement of profit or loss.

4.12 Fair Value Measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date.

The Company categorizes assets and liabilities measured at fair value into one of three levels depending on the ability to observe inputs employed in their measurement which are described as follows:

- (i) Level 1: Quoted Prices (unadjusted) in active markets for identical assets or liabilities
- (ii) Level 2: inputs that are observable, either directly or indirectly, other than quoted prices included within level 1 for the asset or liability.
- (iii) Level 3 : inputs are unobservable inputs for the asset or liability reflecting significant modifications to observable related market data or Company's assumptions about pricing by market participants.

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

4.13 Impairment

a) Financial Asset

Company applies as per Ind AS 109 expected credit loss model for recognising impairment loss on trade receivables, other contractual rights to receive cash or other financial asset. Company applies simplified approach for recognition of expected credit loss on trade receivables and contract assets and general approach for other receivables.

b) Non-Financial Asset

The carrying values of assets / cash generating units at each balance sheet date are reviewed for impairment. If any indication of impairment exists, the recoverable amount of such assets is estimated and impairment is recognized, if the carrying amount of these assets exceeds their recoverable amount. The recoverable amount is the higher of the fair value less cost of disposal and their value in use. Value in use is arrived at by discounting the future cash flows to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risk specific to the asset for which the estimates of future cash flows have not been adjusted. When there is indication that an impairment loss recognized for an asset in earlier accounting periods no longer exists or may have decreased such reversal of impairment loss is recognized in the Statement of Profit and Loss to the extent it does not exceed carrying value of an asset that would have been had the impairment loss not recognised.

4.14 Employee Benefits

(a) Defined Contribution Plans

Contribution to Provident Fund, a defined contribution plan is charged to the Statement of Profit and Loss.

(b) Defined Benefit Plans

Company provides for Gratuity liability on the basis of actuarial valuation done by an independent Actuary, for payment to vested employees at retirement/death while in employment or on termination of employment of an amount equivalent to 15 days salary payable for each completed year of service or part thereof in excess of six months. Vesting occurs upon completion of five years of service as per the provisions of the Gratuity Act, 1972.

(c) Compensated absence

Provision for compensated absences is made on basis of actuarial valuation done by an independent Actuary as on Balance Sheet date.

(d) Short-term employee benefits

Short-term employee benefits are recognized as an expense at the undiscounted amount is charged to the Statement of Profit and Loss for the year in which the related service is rendered.

4.15 Leases

The Company assesses whether a contract is, or contains a lease, at inception of a contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether:

- the contract involves the use of an identified asset;
- the Company has substantially all of the economic benefits from use of the asset throughout the period of the lease and

At the date of commencement of the lease, the Company recognises a lease liability for all lease arrangements in which it is a lessee, except for leases with a term of twelve months or less (short-term leases) and low value leases and corresponding Right-of-use Asset. For these short-term and low value leases, the Company recognises the lease payments as an operating expense on a straight-line basis over the term of the lease.

The Right-of-use Assets are initially recognized at cost, which comprises the initial amount of the lease liabilities adjusted for any lease payments made at or prior to the commencement date of the lease plus any initial direct costs less any lease incentives. They are subsequently measured at cost less accumulated depreciation and impairment losses and adjusted for any remeasurement of the lease liabilities.

Right-of-use Assets are depreciated on a straight-line basis over the shorter of the lease term and useful life of the underlying asset.

The lease liability is initially measured at the present value of the future lease payments. The lease payments are discounted using the interest rate implicit in the lease or, if it is not readily determinable, using the incremental borrowing rate. Lease liabilities are remeasured with a corresponding adjustment to the related right of use asset if the Company changes its assessment if whether it will exercise an extension or a termination option.

The Company accounts for each lease component within the contract as a lease separately from non-lease components of the contract and allocates the consideration in the contract to each lease component on the basis of the relative stand-alone price of the lease component and the aggregate stand-alone price of the non-lease components, except for leases where the company has elected to use practical expedient not to separate non-lease payments from the calculation of the lease liability and ROU asset where the entire consideration is treated as lease component.

Short-term leases and leases of low-value assets :-

The Company applies the short-term lease recognition exemption to its short-term leases of Property, Plant and Equipment (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases that are considered of low value. Lease payments on short-term leases and leases of low-value assets are recognised as expense on a straight-line basis over the lease term or another systematic basis if that basis is more representative of the pattern

4.16 Use of Estimate

The preparation of the financial statements in conformity with recognition and measurement principles of Ind AS requires the Management to make estimates and assumptions that affect the reported balance of assets and liabilities, disclosure relating to contingent liabilities as at the date of the financial statements and the reported amount of income and expense for the period. Estimates and underlying assumptions are reviewed on ongoing basis. Revision of accounting estimates are recognised in the period in which the estimates are revised and future period affected.

Inherent in the application of many of the accounting policies used in preparing the Financial Statements is the need for Management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities, and the reported amounts of revenues and expenses. Actual outcomes could differ from the estimates and assumptions used.

In particular, information about significant areas of estimation uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amounts recognized in the financial statements are included in the following note:

4.17 Estimation of Revenue

The company uses estimates in determining the variable consideration involved in transaction price.

Useful Lives and method of Depreciation of Property, Plant and Equipment

The Company reviews the useful life of property, plant and equipment at the end of each reporting period. This reassessment may result in change in depreciation expense in future periods. Policy for the same has been explained under Note 3.6. Further, the change in depreciation method is a change in accounting estimate affected by a change in accounting principle. A change in accounting estimate affected by a change in accounting principle is to be applied prospectively.

4.18 Contingent Liabilities

In the normal course of business, Contingent Liabilities may arise from litigation and other claims against the Company. Potential liabilities that are possible but not probable of crystallising or are very difficult to reliably quantify are treated as contingent liabilities. Such liabilities are disclosed in the Notes but are not recognised. Potential liabilities that are remote are neither recognised nor disclosed as contingent liability. The management decides whether the matters need to be classified as 'remote', 'possible' or 'probable' based on their best judgements and other relevant facts and circumstances.

4.19 Taxes

Deferred tax assets are recognized for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilized. Significant management judgement is required to determine the amount of deferred tax assets that can be recognized, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

Defined Benefit Obligations

The present value of the gratuity obligation is determined using actuarial valuations for the year ended March 31, 2024. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

The parameter most subject to change is the discount rate. In determining the appropriate discount rate, the management considers the interest rates of government bonds in currencies consistent with the currencies of the post-employment benefit obligation. The mortality rate is based on publicly available mortality tables for the specific countries. Those mortality tables tend to change only at interval in response to demographic changes. Future salary increases and gratuity increases are based on expected future inflation rates for the respective countries.

4.20 Fair value measurement

In measuring the fair value of certain assets and liabilities for financial reporting purpose, the Company uses market observable data to the extent available. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values. Judgments include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Company based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

32 Earnings per share (EPS)

Basic EPS amounts are calculated by dividing the profit for the year attributable to equity holders of the Company by the weighted average number of equity shares outstanding during the year.

Diluted EPS amounts are calculated by dividing the profit attributable to equity holders by the weighted average number of equity shares outstanding during the year plus the weighted average number of equity shares that would be issued on conversion of all the dilutive potential equity shares into equity shares.

34 Employee Benefit Obligation

The Company contributes to the following post employment benefit plan:

Defined contribution plans

The company also has certain defined contribution plans. Contributions are made to provident fund in India for employees at the rate of 12% of basic salary as per regulations. The contributions are made to registered provident fund administered by the government. The obligation of the company is limited to the amount contributed and it has no further contractual nor any constructive obligation. The expense recognised during the year towards defined contribution plan is ₹ 7.96 (March 31, 2023 – ₹ 5.40).

Defined Benefit Plan: Gratuity

The company provides for gratuity for employees in India as per the Payment of Gratuity Act, 1972. Employees who are in continuous service for a period of 5 years are eligible for gratuity. The amount of gratuity payable on retirement/termination is the employee's last drawn basic salary per month computed proportionately for 15 days salary multiplied for the number of years of service. The present value of the defined benefit obligations and the related current service cost and past service cost, were measured using the Projected Unit Credit Method.

Gratuity

The amounts recognised in the balance sheet and the movements in the net defined benefit obligation over the year are as follows:

The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied as when calculating the defined benefit liability recognised in the balance sheet.

The method and types of assumption used in preparing the sensitivity analysis did not changed compared to prior year.

Note:- During FY 2022-23, the employees have been transferred from Apraava Energy Private Limited (AEPL) and Apraava Renewable Energy Private Limited (AREPL). The company is in process of transferring equivalent plan assets maintained with LIC by AEPL and AREPL. (Refer note 33)

34 Employee Benefit Obligation (Continued)

Risk exposure

Through its defined benefit obligation, the company is exposed to a number of risks, the most significant of which are detailed below:

Actuarial Risk: It is the risk that benefits will cost more than expected. This can arise due to one of the following reasons:

Adverse Salary Growth Experience: Salary hikes that are higher than the assumed salary escalation will result into an increase in Obligation at a rate that is higher than expected.

Variability in mortality rates: If actual mortality rates are higher than assumed mortality rate, the Gratuity benefits will be paid earlier than expected. Since there is no condition of vesting on the death benefit, the acceleration of cashflow will lead to an actuarial loss or gain depending on the relative values of the assumed salary growth and discount rate.

Variability in withdrawal rates: If actual withdrawal rates are higher than assumed withdrawal rate, the Gratuity benefits will be paid earlier than expected. The impact of this will depend on whether the benefits are vested as at the resignation date.

Liquidity Risk: Employees with high salaries and long durations or those higher in hierarchy, accumulate significant level of benefits. If some of such employees resign/retire from the company there can be strain on the cashflows.

Market Risk: Market risk is a collective term for risks that are related to the changes and fluctuations of the financial markets. One actuarial assumption that has a material effect is the discount rate. The discount rate reflects the time value of money. An increase in discount rate leads to decrease in Defined Benefit Obligation of the plan benefits & vice versa. This assumption depends on the yields on the government bonds and hence the valuation of liability is exposed to fluctuations in the yields as at the valuation date.

Legislative Risk: Legislative risk is the risk of increase in the plan liabilities or reduction in the plan assets due to change in the legislation/regulation. The government may amend the Payment of Gratuity Act thus requiring the companies to pay higher benefits to the employees. This will directly affect the present value of the Defined Benefit Obligation and the same will have to be recognized immediately in the year when any such amendment is effective.

The Company expects to make a contribution of Rs. 3.12 (2023: Rs. 1.60) to the defined benefits plan during the next financial year.

The average duration of the defined benefit obligation is 6.5 years (2023 – 6.43 years). The expected maturity analysis of gratuity is as follows:

35 Financial risk management
Financial risk management

The Company has exposure to the following risks arising from financial instruments:

- Credit risk ;
- Liquidity risk ;
- Interest-Rate risk ; and
- Market risk

Risk management framework

The Company's Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework. The board of directors has established the Risk Management Committee, which is responsible for developing and monitoring the Company's risk management policies. The committee reports regularly to the board of directors on its activities.

The Company's risk management policies are established to identify and analyse the risks faced by the Company, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Company's activities. The Company, through its training and management standards and procedures, aims to maintain a disciplined and constructive control environment in which all employees understand their roles and obligations.

I. Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Company's receivables from customers and investments securities.

The counterparty risk is mitigated through the point of connection (PoC) mechanism. Under this, PGCIL (a PSU), acting as a central transmission utility (CTU), collects monthly transmission charges from all users of ISTS i.e. state distribution companies (discoms), and pays to each ISTS SPV its respective share of transmission charges.

Cash and cash equivalents

Credit risk on cash and cash equivalents is limited as the Company generally invests in deposits with banks with high credit ratings assigned by domestic credit rating agencies.

II. Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash and making available an adequate amount of committed credit facilities with staggered maturities to reduce refinancing risk in any year and to fund working capital, debt servicing, dividend payments, new investments and close out market positions if required. The company maintains significant flexibility to respond to opportunities and events by ensuring that committed credit lines are available to meet future funding requirements. Management also monitor rolling forecasts of the company's undrawn borrowing facilities and cash and cash equivalents on the expected cash flows. This is generally carried out at Company level in accordance with practice and limits set by the company. In addition, the Company's liquidity management policy involves close monitoring of liquidity position by monitoring cash collection and level of liquid assets necessary to meet cash outflow obligation, monitoring balance sheet liquidity ratios against external regulatory requirements and maintaining debt financing plans.

The table below provides details regarding the remaining contractual maturities of financial liabilities at the reporting date based on contractual undiscounted payments.

Interest rate risk

The Company's interest rate risk arises from debt borrowings. Borrowings issued at variable rates expose the Company to cash flow interest rate risk, while borrowings issued at fixed rates expose the Company to fair value interest rate risk.

Exposure to interest rate risk

The Companies interest rate risk arises primarily from borrowings. However the company has availed all the borrowings at fixed rate of interest which would not be changed till year 2027 for debentures and 2029 for other rupee term loans (Refer note 16). The interest rate profile of the Company's interest bearing financial instruments is as follows:

(a) Interest rate risk exposure	As at March 31, 2024	As at March 31, 2023

Total borrowings	12,662.99	13,054.49

Fair value sensitivity analysis for fixed-rate instruments

The Company does not account for any fixed-rate financial assets or financial liabilities at fair value through profit or loss. Therefore, a change in interest rates at the reporting date would not affect profit or loss.

iii. Market risk

Market risk is the risk that changes in market prices – such as foreign exchange rates and interest rates – will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

The Company provides operation and maintenance services in terms of Transmission Service Agreement. It has unconditional contractual right to receive fixed determinable amount towards such services subject to system availability on or above contractually mandated levels. Thus, it is not exposed to Market Risk except for system technical failure.

b. Fair Value hierarchy

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date under current market conditions.

The Company categorizes assets and liabilities measured at fair value into one of three levels depending on the ability to observe inputs employed in their measurement which are described as follows:

- (i) Level 1: Quoted Prices (unadjusted) in active markets for identical assets or liabilities
- (ii) Level 2: inputs that are observable, either directly or indirectly, other than quoted prices included within level 1 for the asset or liability.
- (iii) Level 3: inputs are unobservable inputs for the asset or liability reflecting significant modifications to observable related market data or Company's assumptions about pricing by market participants.

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

37 Leases as lessee

40 Central Electricity Regulatory Commission ("CERC"), vide its Order ("Order") dated February 25, 2023 had principally allowed/partly allowed certain claims of the Company related to change in law during construction period subject to compliance with directions given in the Order. The directions/conditions given in the aforesaid Order were mainly related to reconciliation of incremental expenditure due to Goods and Services Tax impact in consultation with Long-Term Transmission Customers ("LTTC") exhibiting clear and one to one correlation with the project cost, furnishing an undertaking to LTTC disclosing the applicable land compensation rates prevailing at the time of approval of project cost as well as on bidding date, revalidation of applicable crop compensation based on notification prevailing at the time of bidding, etc. Further, the Order had stated that the company shall be entitled for increase in non-escalable transmission charges subject to re-computation of the increased project cost considering the aforesaid directions duly supported by Chartered Accountant's certificate. The company was also required to provide documentary proofs to LTTC and CERC for increase in project cost to establish the impact of change in law and obtain approval from CERC as per relevant clauses of Transmission Service Agreement (TSA).

Pursuant to the aforesaid order, during the year, the company has fulfilled all the required conditions and also have submitted the claims for incremental tariffs considering the revised tariff schedule and same has been agreed and paid by CTU. This has resulted into additional revenue of Rs. 1078.27 millions related to January 1, 2021 to March 31, 2023.

41 Segment Reporting

Company is engaged in the business of Construction and operating & maintaining the transmission lines, Substation and related operations in India. There are no separate reportable segment as per the reporting and disclosures requirement prescribed by Ind AS 108 - Operating Segments.

The company has a single Transmission Service Agreement with seven Long Term Transmission Customers (LTTCs) for construction and maintenance of Transmission system on BOOM Basis. The billing and payment mechanism for Company is governed under the PoC mechanism with PGCIL acting as the Central Transmission Utility (CTU) handling the billing, collection and disbursement for all the ISTS licensees. PGCIL collects the Tariff charges from designated inter-state customers in a central pool and pays the ISTS licensees from that pool the share of their proportionate charges. Therefore, there are no separate reportable transactions with different customers.

42 The company has entered into a Transmission Service Agreement (TSA) with Long Term Transmission Customers (LTTC) through the tariff based bidding process and is required to create transmission infrastructure to provide services for a period of 35 years on "Build, Own, Operate and Maintain (BOOM)" basis. As per TSA, there is no obligation to transfer these assets to LTTC at the end of agreement period. The useful life of such transmission infrastructure is 40 years as per Schedule II of the Companies Act, 2013 and based on its design and intrinsic strength, useful life is likely to be more than 40 years. Thus, company shall be retaining the significant residual interest that exists on expiry of the agreement. Further, the company has the option to provide transmission services to Open Access Customers other than LTCC and the manner of operating Transmission System is governed by Central Electricity Regulatory Commission (CERC) and not by LTTC. Accordingly, accounting as per Appendix C of Ind AS 115 "Service Concession Arrangements" or erstwhile Ind AS 17 "Leases" was determined as not applicable and the transmission infrastructure being created by the company has been accounted as per Ind AS 16 "Property, Plant and Equipment."
