

PRESS RELEASE

Apraava Energy Secures Interstate Transmission Project in Andhra Pradesh

Mumbai, August 04, 2026: Apraava Energy, one of India's leading integrated energy solutions providers, today announced that it has acquired the Special Purpose Vehicle (SPV), Ananthpuram Transmission Limited, for developing an interstate transmission project in Ananthapur, Andhra Pradesh. The project was awarded through the Government of India's Tariff-Based Competitive Bidding (TBCB) process. It involves the setting up of ~250 circuit kilometres (ckm) of 765 kV transmission lines, along with a 4,500 MVA (3x1500 MVA) 765 kV pooling station, including the installation of a ± 300 MVAR Static Synchronous Compensator (STATCOM).

This project will strengthen the interstate transmission infrastructure in the state of Andhra Pradesh by facilitating the integration and evacuation of ~3 GW of renewable energy from Ananthapur region.

Commenting on the win, **Rajiv Ranjan Mishra, Managing Director, Apraava Energy**, said, "Apraava is pleased to expand its transmission footprint in Andhra Pradesh. The state's strong development trajectory, progressive approach to clean energy, and immense renewable energy potential make it an important part of India's energy transition. We are particularly excited to mark this as our first investment in Andhra Pradesh and look forward to exploring more opportunities to invest in the state. A strong and resilient transmission network is fundamental to unlocking this potential and strengthening India's long-term energy security. At Apraava Energy, we are proud to partner in this national endeavour by developing high-quality transmission assets that strengthen the grid, enable renewable energy integration, and support India's sustainable growth."

Developed under the Build, Own, Operate and Transfer (BOOT) model, the asset will provide transmission services for a concession period of 35 years following commissioning. The completion timeline is set at 36 months from the date of signing of the Transmission Service Agreement (TSA). It is also expected to generate significant direct and indirect employment opportunities during the construction and operational phases.

Apraava currently operates three transmission assets comprising ~1,000 ckm of transmission lines and 3,500 MVA of substation capacity. With the addition of Ananthpuram Transmission Limited, Apraava now has four greenfield transmission projects under construction, adding ~1,180 ckm of transmission lines and ~13,500 MVA of substation capacity.

About Apraava Energy

Apraava Energy is one of India's leading integrated energy solutions providers headquartered in Mumbai. It is jointly owned by the CLP Group, one of the largest investor-owned power businesses in Asia and La Caisse (formerly CDPQ), a global investment group.

Founded in 2002, Apraava has evolved from being a single-asset business to a forward looking, climate conscious organisation spread across 15 states and UTs in India. Its portfolio comprises over 2 GW of installed capacity which includes ~1,200 MW of wind and

250 MW of solar energy projects, three power transmission assets (~1,000 ckm; 3,500 MVA substation capacity) and ~3.6 million installed smart meters.

In addition, four greenfield transmission projects (~1,180 ckm of transmission lines and ~13,500 MVA substation capacity), a wind project (300 MW) and two solar projects (550 MW) are under construction. The company is currently executing orders of 6 million+ smart meters in Assam, Gujarat, West Bengal, Himachal Pradesh, Rajasthan, Puducherry and Madhya Pradesh.

The company aims to invest in low-carbon growth areas, including renewable energy, power transmission and distribution, as well as other non-generation, customer-focused energy businesses.

Apraava is proud to be certified as a Great Place To Work® for the third consecutive year (Dec 2025 – Dec 2026), reflecting its commitment to fostering a workplace built on trust, performance, and positivity. In 2024, the company was also featured among the Top LinkedIn Companies in India.
